Backflow Test Kits Calibration Accuracy Check

A complete evaluation of each test kit includes: Calibration verification, check of all hoses and filters/gaskets/o-rings, fittings, valves and seats for leaks, line pressure gauge accuracy; adjust and calibrate to manufacturer's original specifications; we provide 2 copies of the printed certificate, (email copy will be provided upon request) of calibration traceable to NIST stating that procedures utilized were in accordance with the USC FCCCHR Manual of Cross-Connection Control 10th Edition Appendix A and manufacturer's requirements.

Cost: \$125 (payable by credit card *or prearranged* payment option)

Does not include repairs, *replacement parts, or shipping freight.

Normal turnaround time is 2 to 4 business days.

Hose filters and gaskets will be replaced if needed.

*Old parts will not be returned unless requested in advance.
